- Section: B

# 簽 PROJECT DESCRIPTION

- Syntaxis is a self-hosted, customizable AI-powered chatbot UI that supports multiple AI models like OpenAI GPT, Claude, Gemini, and more. It provides an intuitive chat interface with support for plugins, prompt customization, and data privacy.

# FEATURES

- Multi-model support (GPT, Claude, Gemini, etc.)
- Chat with Markdown and Code rendering
- Plugin and RAG API support
- Easy deployment with Docker
- Secure and self-hosted

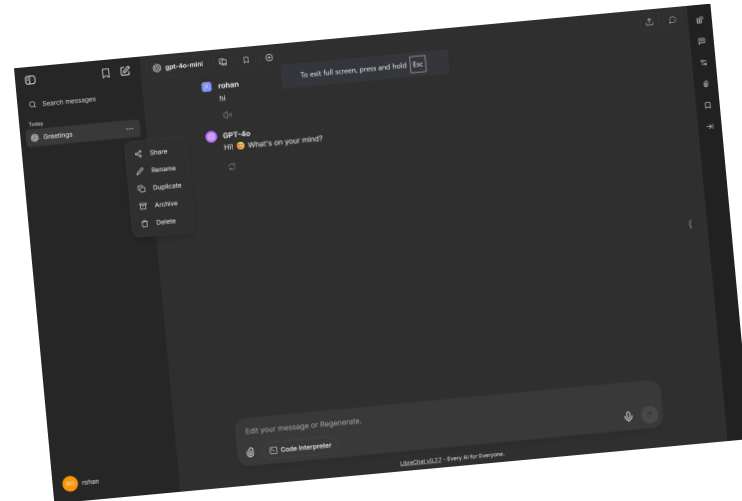

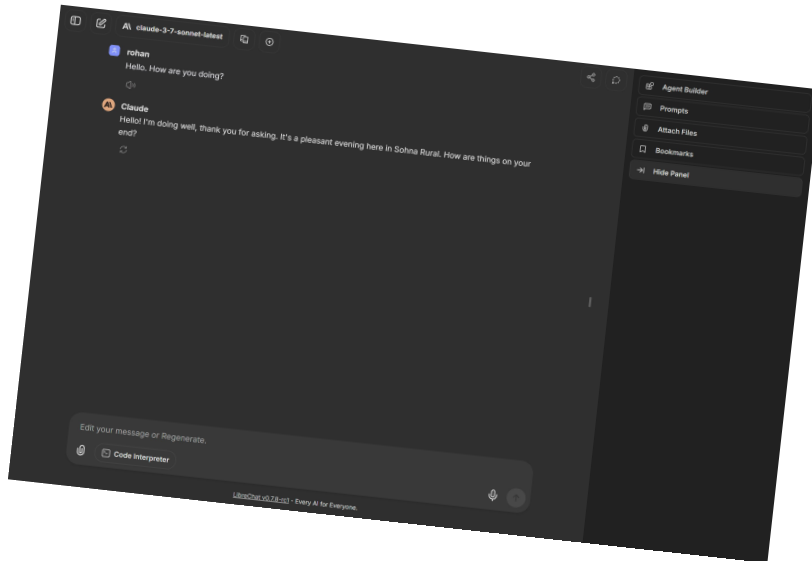

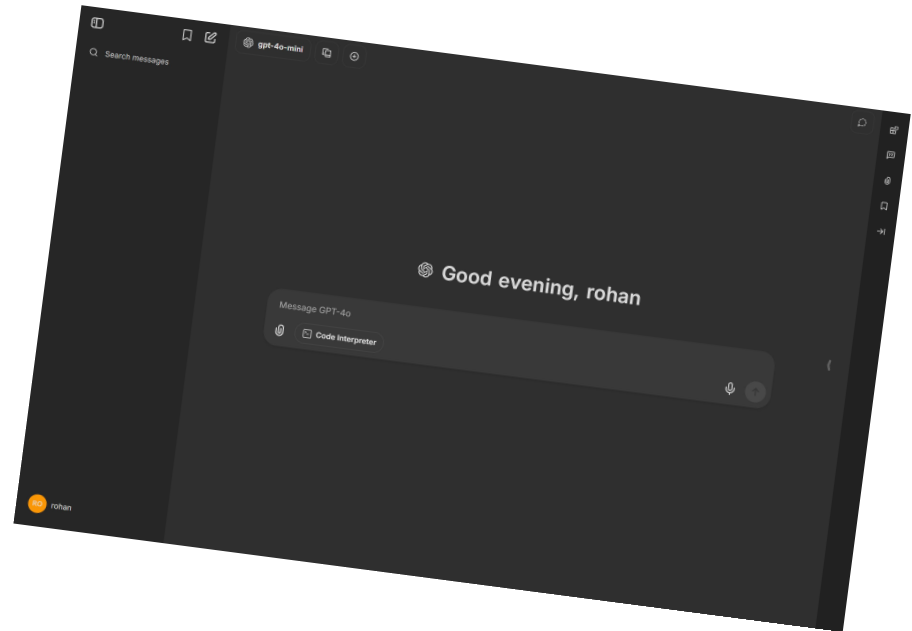

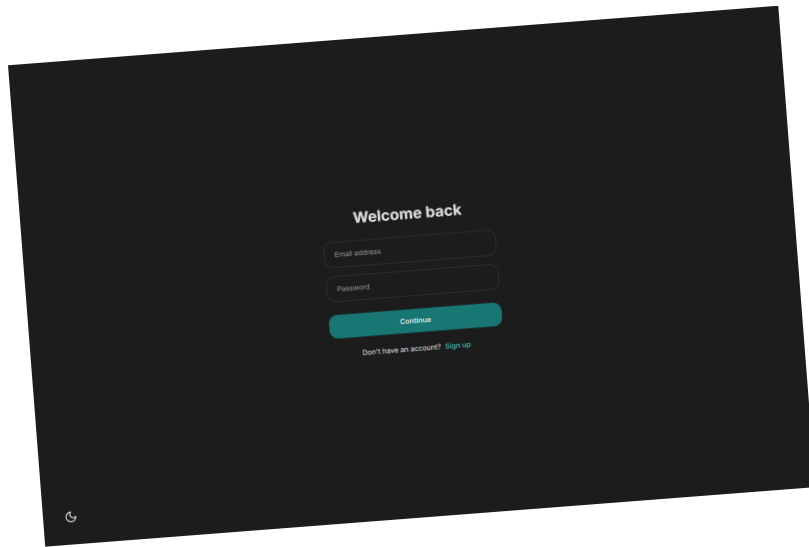

# 稱 TECHNOLOGIES USED

- Node.js, React.js, Express.js
- MongoDB, Meilisearch
- Docker & Docker Compose
- OpenAI / Claude / Gemini APIs

# 初 PROJECT SNAPSHOTS

# 廳 STEPS TO RUN

- 1. Clone the repo
- 2. Rename ``.env.example`` to ``.env`` and fill in keys
- 3. Run using Docker:
  - ``docker-compose up --build``
- 4. Access via ``http://localhost:3080``
